Dear Madam or Sir:

In response to a telephone communication between the U.S. Patent and Trademark Office and the firm prosecuting the above-captioned patent application, the Applicants, through undersigned counsel, respectfully submit that the correct Statement under 37 C.F.R. § 3.73 is already of record in the above-captioned patent application and that therefore, a new Statement is not needed.

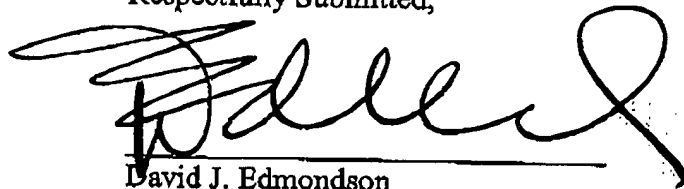

The originally filed Statement identifies the Patent Owner as the Assignee by virtue of an Assignment recorded at reel no. 7858, frame no. 0297. A copy of the USPTO assignment query result for that reel and frame number, identifying the first patent in the chain of continuation, is attached hereto as Exhibit A.

During the above-mentioned telephone communication, it was alleged that the correct reel and frame number are 9889/0872. The undersigned respectfully disagrees. A copy of the USPTO assignment query result for that reel and frame number is attached hereto as Exhibit B. As can be seen, the assignment details for that reel and frame number give both the wrong list of Assignors and the wrong Assignee for the above-captioned application. The undersigned can only conclude that the Assignment recorded at that reel and frame number was incorrectly associated with the present application or its parent, probably because a patent number was mistyped on that Assignment. In short, the Assignment recorded at that reel/frame number evidently bears no relationship to the present application.

For the reasons set forth above, the Applicants respectfully submit that the correct Statement under 37 C.F.R. § 3.73 is already of record and that nothing more is needed from the Applicants for issuance of a patent. Notification of such issuance is earnestly solicited.

If any outstanding issues remain, the Office is invited to telephone the undersigned at the telephone number set forth below.

Respectfully Submitted,

David J. Edmondson
